Content Disclaimer

This documentation is not intended as a substitute for and is not to be used for determining suitability or reliability of these products for specific user applications. It is the duty of any such user or integrator to perform the appropriate and complete risk analysis, evaluation and testing of the products with respect to the relevant specific application or use thereof. Neither ProSoft Technology nor any of its affiliates or subsidiaries shall be responsible or liable for misuse of the information contained herein. Information in this document including illustrations, specifications and dimensions may contain technical inaccuracies or typographical errors. ProSoft Technology makes no warranty or representation as to its accuracy and assumes no liability for and reserves the right to correct such inaccuracies or errors at any time without notice. If you have any suggestions for improvements or amendments or have found errors in this publication, please notify us.

No part of this document may be reproduced in any form or by any means, electronic or mechanical, including photocopying, without express written permission of ProSoft Technology. All pertinent state, regional, and local safety regulations must be observed when installing and using this product. For reasons of safety and to help ensure compliance with documented system data, only the manufacturer should perform repairs to components. When devices are used for applications with technical safety requirements, the relevant instructions must be followed. Failure to use ProSoft Technology software or approved software with our hardware products may result in injury, harm, or improper operating results. Failure to observe this information can result in injury or equipment damage.

This document highlights the new features, fixes, enhancements and known issues for the PLX51-DL-232 Gateway module.

1.1 About the PLX51 Products

Model	Standards
PLX51-DL-232	UL/cUL; Class1Div2

The PLX51-DL-232 Data Logger is ideal for remote sites with limited communications that need to log data.

OEMs can log their machine's data to identify operational problems or efficiency improvements.

The PLX51-DL-232 can read and store data from EtherNet/IP PLCs, DF1 Serial PLCs and devices, or Modbus® PLCs and devices.

The PLX51-DL-232 has the capacity to store over 16 million records in its solid-state non-volatile memory. Each stored record includes a Date Time stamp, Tag Name, Data Type, and Value

1.2 Release Enhancements

Release Version	Release Date	Description
1.003.005	4-Oct-2019	<ul style="list-style-type: none">Updated the Delta Y logging. If set to 0 (zero), do not log.
1.003.004	6-Aug-2019	<ul style="list-style-type: none">Updated the Reply Message Wait to update when DF1 is used.Fixed anomaly with group triggers.Added Micro Revision number for firmware revision number.Added support for non-time based logging when Max Delta Time is zero.
1.002	11-Apr-2018	Initial Release

2 Support, Service & Warranty

In This Chapter

Contacting Technical Support	6
Warranty Information	8

2.1 Contacting Technical Support

ProSoft Technology, Inc. is committed to providing the most efficient and effective support possible. Before calling, please gather the following information to assist in expediting this process:

- 1 Product Version Number
- 2 System architecture
- 3 Network details

If the issue is hardware related, we will also need information regarding:

- 1 Module configuration and associated ladder files, if any
- 2 Module operation and any unusual behavior
- 3 Configuration/Debug status information
- 4 LED patterns
- 5 Details about the serial, Ethernet or Fieldbus devices interfaced to the module, if any.

Note: For technical support calls within the United States, an emergency after-hours answering system allows 24-hour/7-days-a-week pager access to one of our qualified Technical and/or Application Support Engineers. Detailed contact information for all our worldwide locations is available on the following page.
